APTITUDE QUESTION BANK

Problem-Solving & Critical Thinking

Placement preparation for IT company hiring tests

Where the Syllabus Ends and Reality Begins

150	Q1 – Q50	Q51 – Q100	Q101 – Q150
Multiple-choice questions	Beginner	Intermediate	Advanced

About this section

Problem-Solving and Critical Thinking questions test how you judge arguments and make decisions — finding assumptions, strengthening or weakening an argument, picking the best course of action, spotting cause and effect, and solving everyday puzzles. Read only what is given, do not add your own outside facts, and ask: 'What must be true for this to make sense?' Choose the option that is most reasonable, practical and supported.

How to use this question bank

- Part A has all 150 questions, grouped by difficulty. Attempt them on your own first, with a timer if you can (about 1 minute per question).
- Part B is the answer key. Check your answers only after finishing a full level.
- Part C explains how to solve every question in simple steps. Read the solution even for the ones you got right — it often shows a faster method.
- Mark the questions you got wrong and attempt them again after two or three days.

PART A

Questions

BEGINNER Questions 1 – 50

Q1. You have 3 tasks: one due today, one due tomorrow and one due next week. Which should you do first?

A) The task due today
B) The task due next week
C) The easiest task
D) The task you like most

A) Nothing is wrong
B) Phones are always cheap
C) Shopkeepers never lie
D) High price does not prove best quality

Q37. Which is the most logical order for making tea?

A) Add sugar → strain → boil water → add tea
B) Strain → boil water → add milk → add tea
C) Add milk → strain → boil water → add sugar
D) Boil water → add tea leaves → add milk and sugar → strain

Q38. Statement: Attendance in the gym dropped after the fees were doubled. What is the likely reason?

A) Many members found the new fee too high
B) The gym got bigger
C) People became healthier
D) The weather was too good

Q39. A notebook costs ₹25 and a pen ₹15. You buy 2 notebooks and 3 pens. How much do you pay?

A) ₹100
B) ₹95
C) ₹90
D) ₹80

Q40. You are stuck on one question in an exam with many questions left. What is the best strategy?

- **A)** Guess all other answers
- **B)** Spend all remaining time on it
- **C)** Mark it and move on, then return if time permits
- **D)** Leave the exam

Q41. Which of these is an opinion?

- **A)** Online classes are more boring than offline ones
- **B)** Water freezes at 0°C
- **C)** India has 28 states
- **D)** A week has 7 days

Q42. If you save ₹200 every week, how much will you have after 3 months (about 13 weeks)?

- **A)** ₹3,000
- **B)** ₹2,400
- **C)** ₹600
- **D)** ₹2,600

Q43. Course of action: Many customers complain about long waiting times at a bank counter. What should the bank do?

- **A)** Increase fees
- **B)** Close the bank
- **C)** Open more counters or offer online options
- **D)** Stop serving customers

Q44. A train is 'delayed by 30 minutes'. It was due at 6:45 PM. When will it now arrive?

- **A)** 7:45 PM
- **B)** 7:15 PM
- **C)** 7:00 PM
- **D)** 6:15 PM

Q45. Which conclusion is correct? 'Some birds cannot fly. A penguin is a bird.'

- **A)** Penguins are not birds
- **B)** A penguin may or may not be able to fly (from these facts alone)
- **C)** A penguin can fly
- **D)** All birds cannot fly

Q46. You need to choose between two laptops with the same features. One costs ₹45,000, the other ₹50,000. Which is the smarter choice if quality is the same?

- **A)** The ₹45,000 laptop
- **B)** The ₹50,000 laptop
- **C)** Buy both
- **D)** Neither

Q47. A recipe for 4 people needs 2 cups of rice. How many cups are needed for 10 people?

- **A)** 6 cups
- **B)** 4 cups
- **C)** 8 cups
- **D)** 5 cups

Q48. Statement: 'Wear a helmet while riding.' What is the main purpose?

- **A)** To avoid rain
- **B)** To ride faster
- **C)** To protect the head in case of an accident
- **D)** To look stylish

Q49. If today is Friday and an assignment is due in 4 days, on which day is it due?

- **A)** Sunday
- **B)** Monday
- **C)** Wednesday
- **D)** Tuesday

Q50. You receive an email from an unknown sender with an attachment named 'invoice.exe'. What should you do?

- **A)** Open it to check
- **B)** Do not open it and report it as suspicious
- **C)** Forward it to all colleagues
- **D)** Reply asking what it is

INTERMEDIATE Questions 51 – 100

Q51. Argument: 'All employees should work from the office every day, because some employees do not complete their work at home.' What is the weakness of this argument?

A) It is too short
B) It mentions employees
C) It punishes everyone for the behaviour of a few
D) It talks about work

Q52. Statement: 'The company has decided to train all staff in cybersecurity.' Which assumption is implicit?

A) Training will help reduce security risks
B) The staff are all hackers
C) Cybersecurity is not important
D) Training is free

Q53. Which statement, if true, most weakens this claim: 'The new traffic signal reduced accidents on Main Road'?

A) Accidents also fell by the same amount on nearby roads without new signals
B) The signal cost ₹2 lakh
C) The signal is bright red
D) Many people use Main Road

Q54. Which option most strengthens: 'Regular exercise improves concentration in students'?

A) Schools have playgrounds
B) A study shows students who exercise daily score higher on focus tests
C) Some students like football
D) Exercise needs shoes

Q55. A project has 4 tasks: A (3 days), B (2 days, after A), C (4 days, can run alongside A and B), D (1 day, after B and C). What is the minimum time to finish?

A) 10 days
B) 7 days
C) 5 days
D) 6 days

Q56. Course of action: A software release has a critical bug found one day before launch. What is the best action?

A) Release anyway and hope no one notices
B) Blame the tester
C) Delay the release until the bug is fixed and tested, and inform stakeholders
D) Delete the bug report

Q57. Statement: 'Most people who buy our premium plan renew it.' Conclusion: 'The premium plan is valuable to its users.' Is the conclusion reasonable?

A) No, renewal has nothing to do with value
B) Yes, high renewal suggests users find it valuable
C) It is definitely false
D) No, the plan is cheap

Q58. You have 8 identical-looking balls; one is heavier. With a balance scale, what is the minimum number of weighings needed to find it for sure?

A) 2
B) 1
C) 4
D) 3

Q59. Cause and effect: (A) The government reduced tax on electric vehicles. (B) Sales of electric vehicles rose. Which is correct?

A) B is the cause and A is the effect
B) A is the cause and B is the effect
C) Both are independent
D) Both are effects of a common cause

Q60. A manager must choose one of two candidates. Candidate X has excellent skills but poor teamwork; Y has good skills and excellent teamwork. The role is leading a team. Who is the better choice?

A) Whoever asks for less salary
B) Y, because teamwork is essential for leading a team
C) X, because skills are all that matter
D) Neither

Q61. Statement: 'Only 10% of our users use feature Z.' Which decision is most sensible?

A) Delete it immediately
B) Ignore the data
C) Study why usage is low before deciding to improve or remove it
D) Make it the main feature

Q62. What is the hidden assumption in: 'Our sales will double next year because we are hiring more salespeople'?

A) Prices will rise
B) Salespeople are expensive
C) Customers do not exist
D) More salespeople will lead to more sales

Q63. A, B and C are suspects. Exactly one is guilty. A says 'I am innocent.' B says 'C is guilty.' C says 'B is lying.' If only one statement is true, who is guilty?

A) C
B) B
C) A
D) Cannot be determined

Q64. A company's profits fell after it moved customer support overseas. Which conclusion is most cautious and fair?

A) The move may be one of the reasons; other factors should be checked
B) Customer support never matters
C) Moving overseas definitely caused the fall
D) Profits will rise next month

Q65. Which is the best question to ask first when a client says 'The app is not working'?

A) Why are you using our app?
B) What exactly happens, and what were you trying to do?
C) Can you buy a new phone?
D) Have you tried another company?

Q66. You can choose: (1) ₹10,000 now, or (2) ₹10,500 after one year. A safe bank gives 7% interest a year. Which is better financially?

A) ₹10,000 now, invested at 7% gives ₹10,700
B) Cannot decide
C) ₹10,500 after one year
D) Both are equal

Q67. Statement: 'Employees who attend training get promoted faster.' Which, if true, weakens the idea that training causes promotion?

A) Training is held on Mondays
B) Some trainers are new
C) Training rooms are large
D) Only already high-performing employees are selected for training

Q68. Four people need to cross a bridge at night with one torch. They take 1, 2, 5 and 10 minutes. At most 2 can cross at a time, moving at the slower person's pace. What is the minimum total time?

A) 18 minutes
B) 21 minutes
C) 17 minutes
D) 19 minutes

Q69. Course of action: An employee repeatedly shares confidential client data on personal email. What should the company do?

A) Promote the employee
B) Ignore it
C) Investigate, stop the practice and take action as per policy
D) Share the data publicly

Q70. A survey of 50 people at a gym found that 90% like protein shakes. Conclusion: '90% of people in India like protein shakes.' What is the flaw?

A) There is no flaw
B) The sample is small and not representative
C) The percentage is calculated wrongly
D) Gyms do not sell shakes

Q71. If it is raining, then the ground is wet. The ground is wet. What can we conclude?

A) The ground is dry
B) It did not rain
C) It definitely rained
D) It may or may not have rained

Q72. A team must finish 120 test cases in 4 days. After 2 days they have done 50. How many per day must they do now to finish on time?

A) 35
B) 25
C) 30
D) 40

Q73. Which statement is an inference (not directly stated) from: 'The cafeteria ran out of food by 1 PM every day this week'?

A) The cafeteria ran out of food
B) The cafeteria may need to prepare more food
C) It is a week
D) 1 PM is a time

Q74. Prioritise: (1) Server down affecting all users, (2) Typo on the About page, (3) A feature request from one client. Which order is best?

A) 1, 3, 2
B) 3, 2, 1
C) 2, 1, 3
D) 2, 3, 1

Q75. Statement: 'If you study regularly, you will pass.' Ravi did not pass. What can we conclude?

A) Ravi studied regularly
B) Ravi will pass next time
C) Studying does not help
D) Ravi did not study regularly

Q76. A company spends ₹5 lakh on ads and gets 500 new customers, each giving ₹2,000 profit. What is the net gain from the campaign?

A) ₹10 lakh
B) ₹0
C) ₹5 lakh
D) ₹15 lakh

Q77. Which of these is the strongest argument for learning cloud computing?

A) It has a short name
B) Clouds look nice
C) Many companies are moving their systems to the cloud, increasing demand for these skills
D) My friend likes it

Q78. You have to divide 17 chocolates among 3 children as fairly as possible. How should you divide them?

A) 5, 5, 7
B) 6, 6, 5
C) 4, 6, 7
D) 8, 8, 1

Q79. Statement: 'Our website traffic doubled after we redesigned the home page.' Which additional fact would best support that the redesign caused it?

A) No other marketing or changes happened during that period
B) The redesign used blue colours
C) Traffic was low before
D) The team worked overtime

Q80. A box has 3 labels: 'Apples', 'Oranges', 'Mixed'. All labels are wrong. You can pick one fruit from one box. From which box should you pick to fix all labels?

A) Any box
B) The box labelled 'Apples'
C) The box labelled 'Oranges'
D) The box labelled 'Mixed'

Q81. Assumption check: 'Send the report by email, as the manager is travelling.' Which is assumed?

A) The manager hates reports
B) The manager can access email while travelling
C) The report is not ready
D) Email is slow

Q82. A store's sales fell 20% in January and rose 20% in February. Compared with December, February sales are:

A) 4% lower
B) 4% higher
C) 20% lower
D) the same

Q83. Course of action: A new employee keeps making the same mistake in reports. Best action?

A) Fix it silently every time
B) Fire them immediately
C) Give clear feedback, show an example and check the next report
D) Complain to other colleagues

Q84. Two statements: (A) Petrol prices rose. (B) More people started using public transport. What is the relationship?

A) They are unrelated
B) B is the cause of A
C) A is likely the cause of B
D) Both are caused by rain

Q85. You are given 9 coins, one of which is lighter. What is the minimum number of weighings on a balance to find it?

A) 3
B) 4
C) 1
D) 2

Q86. Which is an example of correlation, not necessarily causation?

- **A)** Ice-cream sales and sunburn cases both rise in summer
- **B)** Pressing a switch turns on the light
- **C)** Heating ice makes it melt
- **D)** Dropping a glass causes it to break

Q87. Decision: You can take a job with ₹6 LPA near home or ₹7 LPA with ₹1.5 lakh extra yearly travel and rent costs. Which is better purely financially?

- **A)** ₹6 LPA near home
- **B)** Cannot decide
- **C)** ₹7 LPA far away
- **D)** Both are equal

Q88. Statement: 'This medicine is natural, so it must be safe.' What is the flaw?

- **A)** Medicines are always unsafe
- **B)** Natural things are expensive
- **C)** Being natural does not guarantee safety
- **D)** There is no flaw

Q89. A printer prints 20 pages per minute. How long will it take to print 15 copies of a 40-page document?

- **A)** 20 minutes
- **B)** 30 minutes
- **C)** 15 minutes
- **D)** 40 minutes

Q90. Which response best shows critical thinking when you read a viral news post?

- **A)** Comment angrily
- **B)** Believe it because many people shared it
- **C)** Check the source and look for the same news on trusted sites
- **D)** Share it quickly

Q91. A team of 5 has to be split into two groups for two tasks, one needing 2 people and the other 3. In how many ways can this be done?

- **A)** 10
- **B)** 20
- **C)** 15
- **D)** 5

Q92. Which statement must be true if 'No manager in this company is under 30' and 'Priya is a manager in this company'?

- **A)** Priya is under 30
- **B)** Priya is a CEO
- **C)** Priya is the youngest employee
- **D)** Priya is 30 or older

Q93. Course of action: A company finds that 40% of its new hires quit within 3 months. What should it do first?

A) Increase working hours
B) Stop hiring
C) Conduct exit interviews to understand why
D) Ignore the issue

Q94. A bus can carry 45 passengers. How many buses are needed for 200 passengers?

A) 5
B) 4.44
C) 6
D) 4

Q95. Argument: 'Students should learn coding because it builds logical thinking and opens career options.' Which, if true, best supports it?

A) Some students prefer drawing
B) Studies show coding practice improves problem-solving skills
C) Computers are costly
D) Coding uses computers

Q96. You promised to deliver a task by Friday, but realise on Wednesday that you will need till Monday. What is the most professional action?

A) Say nothing and submit Monday
B) Blame a colleague
C) Submit incomplete work Friday without telling anyone
D) Inform your manager now with the reason and a new date

Q97. A password must have 4 digits, and the first digit cannot be 0. How many passwords are possible?

A) 10,000
B) 5,040
C) 9,000
D) 9,999

Q98. Which conclusion is best supported? 'In a test, all students who practised daily scored above 70. Ali scored 65.'

A) Ali is the weakest student
B) Ali did not practise daily
C) Ali practised daily
D) The test was unfair

Q99. A shop raises prices by 10% and then offers a 10% discount. Compared with the original price, the final price is:

A) 1% lower
B) 10% lower
C) 1% higher
D) the same

Q100. A phone battery drops from 100% to 70% in 3 hours of use. At the same rate, how many more hours will it last until 0%?

A) 10 hours
B) 6 hours
C) 9 hours
D) 7 hours

ADVANCED Questions 101 – 150

Q101. Argument: 'Our competitor reduced prices and lost money. So we should never reduce prices.' Which flaw does this argument have?

A) It generalises from a single case that may have different conditions
B) It mentions a competitor
C) It is too long
D) It uses numbers

Q102. A company must cut costs by 15%. Options: (A) Lay off 15% of staff, (B) Reduce cloud waste and renegotiate vendor contracts, (C) Stop all training. Which is the best first step?

A) Do nothing
B) A, because people are the biggest cost
C) C, since training is not needed
D) B, since it saves money without harming people or capability

Q103. Which assumption is required for this argument: 'Moving our app to the cloud will reduce costs, because we will no longer need to maintain physical servers'?

A) All apps are on the cloud
B) Cloud costs will be lower than the cost of maintaining physical servers
C) Cloud providers are friendly
D) Servers are heavy

Q104. You have two ropes. Each takes exactly 60 minutes to burn completely, but they burn unevenly. How can you measure exactly 45 minutes?

A) It cannot be done
B) Cut each rope in half
C) Light rope 1 at both ends and rope 2 at one end; when rope 1 finishes, light the other end of rope 2
D) Burn both ropes at one end

Q105. Data: Company A's revenue grew from ₹100 cr to ₹150 cr; Company B's from ₹20 cr to ₹40 cr. Which statement is correct?

A) B grew more in absolute terms
B) A grew faster in both ways
C) B grew faster in percentage terms; A grew more in absolute terms
D) Both grew equally

Q106. Statement: 'Since we introduced flexible hours, employee satisfaction rose and attrition fell.' Which, if true, would most strengthen the claim that flexible hours caused these changes?

A) Similar companies without flexible hours saw no change in satisfaction or attrition
B) Flexible hours were introduced in March
C) Employees like weekends
D) The HR team grew

Q107. A, B, C, D sit for an interview. Exactly two are selected. If A is selected, B is not. If C is selected, D is also selected. B is selected. Who else is selected?

A) C
B) D
C) A
D) Cannot be determined

Q108. A bat and a ball cost ₹110 together. The bat costs ₹100 more than the ball. How much does the ball cost?

A) ₹1
B) ₹5
C) ₹10
D) ₹15

Q109. Course of action: Customer data was leaked due to a misconfigured storage bucket. Which sequence is best?

A) Delete all logs, then deny the leak
B) Notify customers first, fix nothing
C) Wait to see if anyone notices
D) Secure the bucket, assess the impact, notify affected parties and regulators as required, fix processes

Q110. Logic: 'Every senior developer reviews code. Some people who review code are interns.' Which must be true?

A) No intern reviews code
B) All interns are senior developers
C) Some senior developers are interns
D) None of these must be true

Q111. A team estimates a task at 8 days with 4 people. Two people leave on day 3 (after 2 full days). Assuming equal speed, when will the task finish?

A) Day 10
B) At the end of day 14
C) Day 8
D) Day 16

Q112. Which is the best interpretation of '95% of users who tried feature X found it useful' if only 2% of all users tried it?

A) We know little about how the other 98% would find it
B) Feature X is useless
C) Feature X is useful to 95% of all users
D) Only 2% of users are active

Q113. You have 12 identical-looking coins; one is fake and may be heavier or lighter. What is the minimum number of weighings on a balance to find the fake and know whether it is heavier or lighter?

A) 4
B) 6
C) 3
D) 2

Q114. Statement: 'Hiring freelancers is cheaper than hiring full-time employees.' Which, if true, most weakens this?

A) Full-time employees have ID cards
B) Some freelancers are experienced
C) Freelancers work from home
D) Freelancers need much more supervision and rework, raising total costs

Q115. An analyst says: 'Cities with more hospitals have more deaths, so hospitals cause deaths.' What is the best explanation of the error?

A) Bigger populations lead to both more hospitals and more deaths
B) Hospitals are expensive
C) Deaths cause hospitals
D) The analyst used wrong numbers

Q116. Five tasks with durations (days) and dependencies: A(2), B(3, after A), C(4, after A), D(2, after B and C), E(1, after D). What is the shortest completion time?

A) 12 days
B) 9 days
C) 10 days
D) 8 days

Q117. A shop has two discount options: (1) 30% off, or (2) 20% off followed by 10% off. Which is better for the customer?

A) Option 1
B) Option 2
C) Depends on the item
D) Both are equal

Q118. Assumption: 'To improve placement rates, the institute should invest in mock interviews.' Which assumption underlies this?

A) Students do not want jobs
B) Students' interview performance affects their selection
C) Companies do not interview
D) Mock interviews are free

Q119. Three statements: (1) All A are B. (2) Some B are C. (3) No C is D. Which conclusion definitely follows?

A) Some A are C
B) All B are A
C) Some B are not D
D) No A is D

Q120. Your manager asks you to inflate test results slightly before a client demo. What is the best response?

A) Explain the risks, share the true results and suggest how to present them honestly
B) Quit immediately without discussion
C) Change the results secretly and tell no one
D) Inflate them as asked

Q121. A product's monthly users: Jan 1,000, Feb 1,200, Mar 1,440. If the same growth rate continues, what are the expected users in May?

A) 2,000
B) 1,680
C) 2,074
D) 1,920

Q122. Which statement best describes 'confirmation bias'?

A) Checking facts carefully
B) Agreeing with the majority
C) Confirming a booking twice
D) Looking only for information that supports what you already believe

Q123. Data sufficiency style: A project is profitable if revenue exceeds cost. Revenue = ₹12 lakh. Is it profitable?

I. Cost of labour is ₹7 lakh.

II. Total cost is 80% of revenue.

A) Only II is enough
B) Only I is enough
C) Both are needed
D) Neither is enough

Q124. A delivery company can use route X (40 km, avg 40 km/h) or route Y (30 km, avg 20 km/h). Which is faster?

A) Cannot decide
B) Route X
C) Route Y
D) Both take the same time

Q125. A survey asks: 'Don't you agree that our excellent service deserves 5 stars?' What is wrong with it?

A) Nothing is wrong
B) It is a leading question that pushes a particular answer
C) It is too short
D) It uses the word 'service'

Q126. In a meeting, two senior colleagues strongly disagree on a technical approach. As the moderator, what is the best step?

A) End the meeting
B) Pick the louder person's idea
C) Ask the newest member to decide
D) Ask each to state their reasoning and agree on objective criteria to compare the options

Q127. A jar has 5 red and 5 green marbles. What is the minimum number you must draw (without looking) to be sure of getting 3 of the same colour?

A) 5
B) 6
C) 4
D) 3

Q128. Statement: 'Students who sit in the front row get better grades. So all students should sit in front.' Which is the biggest weakness?

A) Classrooms have only one front row
B) Front rows are cold
C) Better students may choose the front row; the seat may not cause the grades
D) Grades are not important

Q129. A company has two candidates for a service: Vendor P charges ₹2 lakh setup + ₹10,000 per month; Vendor Q charges no setup + ₹25,000 per month. After how many months does P become cheaper?

A) Never
B) After 10 months
C) After 13 months
D) After 20 months

Q130. Which of the following is a valid deduction? 'If the server is overloaded, the response time exceeds 2 seconds. The response time is 1.5 seconds.'

A) The server is not overloaded
B) Nothing can be concluded
C) The server is overloaded
D) The response time is slow

Q131. Your team has 3 bugs: Bug 1 affects 5% of users with a crash; Bug 2 affects 60% with a minor visual glitch; Bug 3 is a security hole that has not yet been exploited. Which should be fixed first?

A) Bug 2, because it affects the most users
B) Bug 1, because crashes are visible
C) Bug 3, because security risks can cause severe damage once exploited
D) None of them

Q132. A test has 4 options per question. If you guess randomly on 20 questions, how many do you expect to get right?

A) 4
B) 5
C) 10
D) 2

Q133. Argument: 'Our app has more downloads than our rival's, so our app is better.' Which missing information matters most?

A) The number of developers
B) The colour of the app icon
C) Retention and active usage after download
D) The app's launch date only

Q134. A water tank has an inlet that fills 10 L/min and an outlet that drains 4 L/min. The tank holds 300 L and is empty. Both are opened together, and the outlet is closed after 20 minutes. When will the tank be full?

A) After 50 minutes
B) After 38 minutes
C) After 30 minutes
D) After 34 minutes

Q135. Which principle best describes 'If you cannot measure it, you cannot improve it' in project management?

A) Use clear metrics to track and improve performance
B) Measure only costs
C) Avoid all measurements
D) Improvement is impossible

Q136. A candidate claims: 'I increased sales by 200%.' What is the best follow-up question to test the claim?

A) Are you sure?
B) What is your favourite colour?
C) Do you like sales?
D) From what starting figure, over what period, and what was your specific role?

Q137. Logic grid: Three employees — Anu, Bilal, Chen — work in HR, IT and Finance (one each). Anu is not in IT. Chen is in Finance. Where does Bilal work?

A) IT
B) HR
C) Finance
D) Cannot be determined

Q138. Which option shows the 'sunk cost fallacy'?

A) Stopping a project that is not working
B) Reviewing costs before deciding
C) Investing in a promising new idea
D) Continuing a failing project only because a lot has already been spent on it

Q139. If a statement is 'Some managers are not engineers', which statement must be false?

A) Some managers are engineers
B) No manager is an engineer
C) All managers are engineers
D) Some engineers are not managers

Q140. A website gets 10,000 visitors a month; 2% buy, spending ₹1,500 on average. If a redesign raises conversion to 3%, how much extra monthly revenue is expected?

A) ₹1,50,000
B) ₹4,50,000
C) ₹3,00,000
D) ₹15,000

Q141. Your team lead gives instructions that conflict with the written project requirements. What should you do?

A) Do nothing until someone notices
B) Follow the instruction silently
C) Point out the conflict and get the correct requirement confirmed in writing
D) Follow the document silently

Q142. Cause and effect: (A) A popular food app reduced delivery fees. (B) Restaurant orders on rival apps dropped. Best description?

A) A is a likely cause of B
B) B caused A
C) Both are unrelated
D) Both are effects of rain

Q143. Six people must be seated at a round table. In how many distinct ways can they be seated (rotations are the same)?

A) 60
B) 720
C) 360
D) 120

Q144. Which is the strongest reason to back up important data regularly?

A) It is fashionable
B) Hardware failure, malware or mistakes can cause permanent data loss
C) Backups make computers faster
D) Backups make files bigger

Q145. A study finds people who drink green tea live longer. Which alternative explanation should be ruled out before saying green tea causes longer life?

A) Green tea is green
B) Tea is served hot
C) Tea is popular in Asia
D) Green tea drinkers may also exercise more and eat healthier

Q146. You have 100 tasks; 80% of the value comes from 20 of them. According to the Pareto principle, what should you focus on?

A) The 20 high-value tasks first
B) The easiest tasks
C) The last 80 tasks
D) All 100 equally

Q147. Trains leave a station at 6:10 AM and then every 25 minutes. A passenger reaches the station at 8:00 AM. How long must he wait for the next train?

A) 10 minutes
B) 5 minutes
C) 15 minutes
D) 20 minutes

Q148. Which statement is the best example of a SMART goal?

A) Do better at marketing
B) Increase monthly sign-ups by 10% by 31 March
C) Get more users someday
D) Be the best company

Q149. Two investments: P gives 10% simple interest for 3 years; Q gives 9% compound interest for 3 years. On ₹10,000, which earns more interest?

A) Cannot say
B) P
C) Q
D) Both earn the same

Q150. Statement: 'Introducing a 4-day work week will increase productivity.' Which evidence would best test this claim?

A) Comparing output per employee before and after a pilot, against a similar team that kept 5 days

B) Asking employees if they like 4-day weeks

C) Counting the number of meetings

D) Checking how many people take leave on Fridays

PART B

Answer Key

BEGINNER Questions 1 – 50

Q.No	Ans	Q.No	Ans	Q.No	Ans	Q.No	Ans	Q.No	Ans

PART C

How to Solve — Step-by-Step Solutions

Each solution shows the correct option and a simple way to reach it. Try to understand the method, not just the answer — the same method works for many similar questions.

BEGINNER Questions 1 – 50

Q1 Answer: A) The task due today

When deadlines differ, start with the most urgent — the one due today.

Q2 Answer: C) Check if the bulb is fused or loose

Start with the simplest, most likely cause — a loose or fused bulb — before anything costly.

Q3 Answer: D) Drinking water helps keep the body healthy

The advice only makes sense if drinking water is good for health.

Q4 Answer: B) 4

12 × 4 = 48 (fits), 12 × 5 = 60 (too much). So 4 pens.

Q5 Answer: C) Roads were waterlogged in the morning

Heavy rain most directly causes water to collect on roads.

Q6 Answer: D) Talk to them privately to understand the reason

A calm private conversation helps find the reason and fix it without embarrassment.

Q7 Answer: A) The shops are closed

All shops close at 8 PM, and it is later than that, so they are closed.

Q8 Answer: B) 8:20 AM

8:20 + 40 minutes = 9:00. The 8:40 bus would arrive at 9:20, which is late.

Q9 Answer: A) People want to save time while shopping

The advertisement assumes people care about saving time.

Q10 Answer: D) 3

Both sons share the same sister. Children = 2 sons + 1 daughter = 3.

Q11 Answer: B) Divide 100 by 4 and see if you get 25

Reverse the operation: 100 ÷ 4 = 25 confirms the multiplication.

Q12 Answer: C) Find out the reasons and arrange extra classes

A sensible action addresses the cause — understand why and give extra support.

Q13 Answer: A) Yes, it gives a valid reason

The argument gives a clear and true benefit (saving electricity), so it is strong.

Q14 Answer: C) 10

Each pair shakes once: 5 × 4 ÷ 2 = 10.

Q15 Answer: D) Treat it as a likely scam and do not pay

Real prizes never ask you to pay first. This is a common fraud pattern.

Q16 Answer: B) Poor harvest due to bad weather

Less supply (a poor harvest) is a common reason for higher prices.

Q17 Answer: C) 24 litres

1 litre × 24 hours = 24 litres.

Q18 Answer: A) ₹120

For every 3 soaps you pay for 2. 6 soaps = 2 sets → pay for 4 → 4 × 30 = ₹120.

Q19 Answer: B) Raj must wear an ID card

The rule applies to all employees, so it applies to Raj.

Q20 Answer: D) Close unused programs and restart

Closing unused programs and restarting often fixes slowness and costs nothing.

Q21 Answer: C) ₹150

₹450 ÷ 3 = ₹150.

Q22 Answer: D) Water boils at 100°C at sea level

A fact can be proven. The boiling point of water at sea level is a measured fact; the rest are personal opinions.

Q23 Answer: B) Put up warning signs and speed breakers

Practical safety steps at the danger spot reduce accidents without stopping traffic.

Q24 Answer: A) 2 minutes

10 ÷ 5 = 2 minutes per question.

Q25 Answer: D) 10:15

A fast clock shows more than the real time. Real time = 10:20 − 5 = 10:15.

Q26 Answer: A) Tickets may sell out

The warning only makes sense if tickets could run out.

Q27 Answer: B) 9

All others are even. 9 is odd.

Q28 Answer: C) Politely refuse, as it is cheating

Sharing answers is dishonest and breaks the rules. The right choice is to refuse politely.

Q29 Answer: D) Fill the 5-litre jug and pour into the 3-litre jug until full

5 − 3 = 2. After filling the 3-litre jug from the 5-litre jug, exactly 2 litres remain.

Q30 **Answer: C) Sales of its product increased**

Advertising aims to attract customers, so a rise in sales is the likely effect.

Q31 **Answer: A) The company's official careers website**

Official websites give accurate, verified information and avoid fake job scams.

Q32 **Answer: B) 3**

With 2 colours, after 3 socks at least two must be the same colour.

Q33 **Answer: C) Yes, it gives a direct and important reason**

The reason (risk of accidents) is directly connected to the suggestion, so it is strong.

Q34 **Answer: A) 4:00 PM**

90 minutes = 1 hour 30 minutes. 2:30 + 1:30 = 4:00 PM.

Q35 **Answer: B) Alert others and inform security / use the fire extinguisher if trained**

Safety first — raise the alarm and follow fire procedures.

Q36 **Answer: D) High price does not prove best quality**

The argument assumes price equals quality, which is not necessarily true.

Q37 **Answer: D) Boil water → add tea leaves → add milk and sugar → strain**

You must boil water first, then brew, then add milk and sugar, and strain at the end.

Q38 **Answer: A) Many members found the new fee too high**

The timing suggests the higher fee caused members to leave.

Q39 **Answer: B) ₹95**

2 × 25 = 50, 3 × 15 = 45. Total = ₹95.

Q40 **Answer: C) Mark it and move on, then return if time permits**

Moving on protects your time for questions you can solve; come back later.

Q41 **Answer: A) Online classes are more boring than offline ones**

'More boring' is a personal feeling, not a provable fact.

Q42 **Answer: D) ₹2,600**

₹200 × 13 = ₹2,600.

Q43 **Answer: C) Open more counters or offer online options**

The best action solves the problem — more counters or digital services reduce waiting.

Q44 **Answer: B) 7:15 PM**

6:45 + 30 minutes = 7:15 PM.

Q45 **Answer: B) A penguin may or may not be able to fly (from these facts alone)**

The statements alone do not tell us whether the penguin is in the 'cannot fly' group. (From real-world knowledge we know it cannot, but logic questions use only the given facts.)

Q46 **Answer: A) The ₹45,000 laptop**

With the same features and quality, the cheaper option gives better value.

Q47 **Answer: D) 5 cups**

Each person needs 2 ÷ 4 = 0.5 cup. For 10 people: 10 × 0.5 = 5 cups.

Q48 **Answer: C) To protect the head in case of an accident**

Helmets protect the head from injury during falls or accidents.

Q49 **Answer: D) Tuesday**

Friday + 4 days: Sat (1), Sun (2), Mon (3), Tue (4).

Q50 **Answer: B) Do not open it and report it as suspicious**

An '.exe' file from an unknown sender is a classic sign of malware. Do not open it; report it.

INTERMEDIATE Questions 51 – 100

Q51 Answer: C) It punishes everyone for the behaviour of a few

The argument uses a problem with some employees to make a rule for all, which is an over-generalisation.

Q52 Answer: A) Training will help reduce security risks

A company spends on training only if it believes training will improve security.

Q53 Answer: A) Accidents also fell by the same amount on nearby roads without new signals

If accidents fell equally where there was no new signal, something else (not the signal) likely caused the drop.

Q54 Answer: B) A study shows students who exercise daily score higher on focus tests

Direct evidence linking exercise to better focus supports the claim.

Q55 Answer: D) 6 days

Path A → B takes 3 + 2 = 5 days. C takes 4 days alongside, so it finishes earlier. D starts after both (day 5) and takes 1 day → 6 days.

Q56 Answer: C) Delay the release until the bug is fixed and tested, and inform stakeholders

Releasing with a known critical bug harms users and trust. Delaying with clear communication is responsible.

Q57 Answer: B) Yes, high renewal suggests users find it valuable

People generally renew what they find useful, so the conclusion is reasonable (though not 100% proven).

Q58 Answer: A) 2

Weigh 3 vs 3. If balanced, the heavy ball is among the other 2 — weigh them. If not, take the heavier 3 and weigh 1 vs 1. Either way, 2 weighings.

Q59 Answer: B) A is the cause and B is the effect

Lower tax makes EVs cheaper, which leads to higher sales. A causes B.

Q60 Answer: B) Y, because teamwork is essential for leading a team

For a team-lead role, teamwork is a key requirement, and Y also has good skills.

Q61 Answer: C) Study why usage is low before deciding to improve or remove it

Low usage can have many causes (hard to find, not useful). Investigating first leads to a better decision.

Q62 Answer: D) More salespeople will lead to more sales

The conclusion depends on the belief that hiring more salespeople directly increases sales.

Q63 Answer: C) A

If A is guilty: A's statement false, B's false, C's ('B is lying') true → exactly one true ✓.

If B guilty: A true and C true ✗. If C guilty: A true, B true ✗.

Q64 Answer: A) The move may be one of the reasons; other factors should be checked

Timing alone does not prove cause. A fair conclusion considers it a possible reason and checks others.

Q65 Answer: B) What exactly happens, and what were you trying to do?

Specific details about the problem help find the cause quickly.

Q66 Answer: A) ₹10,000 now, invested at 7% gives ₹10,700

₹10,000 × 1.07 = ₹10,700 after one year, which is more than ₹10,500.

Q67 Answer: D) Only already high-performing employees are selected for training

If only top performers get training, their promotions may be due to their performance, not the training.

Q68 Answer: C) 17 minutes

1 & 2 cross (2), 1 returns (1), 5 & 10 cross (10), 2 returns (2), 1 & 2 cross (2). Total = 2 + 1 + 10 + 2 + 2 = 17 minutes.

Q69 Answer: C) Investigate, stop the practice and take action as per policy

This is a serious security and trust issue. It must be investigated and handled under company policy.

Q70 Answer: B) The sample is small and not representative

Gym-goers are not typical of the whole population, and 50 people is a very small sample.

Q71 Answer: D) It may or may not have rained

The ground could be wet for other reasons (a sprinkler, a spill). Assuming rain is a common logical error ('affirming the consequent').

Q72 Answer: A) 35

Remaining = 120 − 50 = 70 in 2 days → 35 per day.

Q73 Answer: B) The cafeteria may need to prepare more food

The passage states the facts. The inference is the reasonable next thought: they may need to make more food.

Q74 Answer: A) 1, 3, 2

Fix the outage first (highest impact), then the client request, then the minor typo.

Q75 Answer: D) Ravi did not study regularly

If 'study → pass' is true, then 'not pass → not study' must be true (contrapositive).

Q76 Answer: C) ₹5 lakh

Profit from customers = 500 × 2,000 = ₹10 lakh. Net gain = 10 − 5 = ₹5 lakh.

Q77 Answer: C) Many companies are moving their systems to the cloud, increasing demand for these skills

It gives a practical, verifiable reason linked to career benefit.

Q78 Answer: B) 6, 6, 5

17 ÷ 3 = 5 remainder 2. Give everyone 5, then 1 extra to two children → 6, 6, 5.

Q79 Answer: A) No other marketing or changes happened during that period

Ruling out other causes makes the redesign the most likely reason.

Q80 **Answer: D) The box labelled 'Mixed'**

The 'Mixed' box cannot be mixed (label is wrong), so it holds only one type. One fruit tells you which, and the other two labels then follow.

Q81 **Answer: B) The manager can access email while travelling**

Choosing email only makes sense if the manager can read emails on the move.

Q82 **Answer: A) 4% lower**

100 → 80 (−20%) → 96 (+20% of 80). 96 is 4% lower than 100.

Q83 **Answer: C) Give clear feedback, show an example and check the next report**

Clear feedback with an example helps the employee learn; follow-up checks confirm improvement.

Q84 **Answer: C) A is likely the cause of B**

Costlier petrol pushes people to cheaper options like public transport.

Q85 **Answer: D) 2**

Split into 3 groups of 3. Weigh two groups — the lighter side (or the unweighed group if balanced) has the coin. Then weigh 1 vs 1 from that group. Total 2.

Q86 **Answer: A) Ice-cream sales and sunburn cases both rise in summer**

Both rise together because of hot weather, but ice-cream does not cause sunburn.

Q87 **Answer: A) ₹6 LPA near home**

₹7 LPA − ₹1.5 lakh = ₹5.5 lakh effective, which is less than ₹6 lakh.

Q88 **Answer: C) Being natural does not guarantee safety**

Many natural substances can be harmful. 'Natural' does not prove 'safe'.

Q89 **Answer: B) 30 minutes**

Total pages = 15 × 40 = 600. Time = 600 ÷ 20 = 30 minutes.

Q90 **Answer: C) Check the source and look for the same news on trusted sites**

Verifying the source and cross-checking protects against fake news.

Q91 **Answer: A) 10**

Choose the 2 people for the first task; the rest form the second group: 5C2 = 10.

Q92 **Answer: D) Priya is 30 or older**

No manager is under 30, so Priya, being a manager, is at least 30.

Q93 **Answer: C) Conduct exit interviews to understand why**

Finding the reasons is the first step to fixing high early attrition.

Q94 **Answer: A) 5**

200 ÷ 45 = 4.44. You cannot hire part of a bus, so round up to 5.

Q95 **Answer: B) Studies show coding practice improves problem-solving skills**

Evidence that coding improves problem-solving directly backs the 'logical thinking' reason.

Q96 **Answer: D) Inform your manager now with the reason and a new date**

Early, honest communication lets others plan and maintains trust.

Q97 **Answer: C) 9,000**

First digit: 9 choices (1–9). Each of the other three: 10 choices. 9 × 10 × 10 × 10 = 9,000.

Q98 **Answer: B) Ali did not practise daily**

Every daily practiser scored above 70. Ali scored 65, so he cannot be a daily practiser.

Q99 **Answer: A) 1% lower**

100 → 110 → 110 × 0.9 = 99. The final price is 1% lower.

Q100 **Answer: D) 7 hours**

It uses 30% in 3 hours, which is 10% per hour. 70% left ÷ 10% per hour = 7 more hours.

ADVANCED Questions 101 – 150

Q101 **Answer: A) It generalises from a single case that may have different conditions**

One competitor's result does not prove the same will happen to us; costs, customers and timing may differ.

Q102 **Answer: D) B, since it saves money without harming people or capability**

Eliminating waste and renegotiating contracts saves money with the least damage to the team and long-term capability.

Q103 **Answer: B) Cloud costs will be lower than the cost of maintaining physical servers**

The conclusion only follows if the new cloud bills are less than the saved server costs.

Q104 **Answer: C) Light rope 1 at both ends and rope 2 at one end; when rope 1 finishes, light the other end of rope 2**

Rope 1 lit at both ends burns out in 30 minutes. Rope 2 then has 30 minutes left; lighting its other end makes it finish in 15 more. 30 + 15 = 45.

Q105 **Answer: C) B grew faster in percentage terms; A grew more in absolute terms**

A: +₹50 cr (50%). B: +₹20 cr (100%). B has the higher growth rate; A has the larger absolute increase.

Q106 **Answer: A) Similar companies without flexible hours saw no change in satisfaction or attrition**

If comparable companies without the change saw no improvement, flexible hours become the most likely cause.

Q107 **Answer: B) D**

B is selected, so A is not (A → not B means B → not A). If C were selected, D would also be, making 3 selections ×. So C is not selected, and the second person must be D.

Q108 **Answer: B) ₹5**

Let ball = x. Bat = x + 100. x + x + 100 = 110 → 2x = 10 → x = ₹5. (The quick answer ₹10 is a trap: then the bat would be ₹110 and the total ₹120.)

Q109 **Answer: D) Secure the bucket, assess the impact, notify affected parties and regulators as required, fix processes**

Contain first, understand impact, communicate as legally required, then prevent recurrence.

Q110 **Answer: D) None of these must be true**

The overlap between reviewers who are interns and reviewers who are senior developers is unknown, so none of the listed statements is certain.

Q111 **Answer: B) At the end of day 14**

Total work = 4 × 8 = 32 person-days. In 2 days, 8 person-days are done; 24 remain. With 2 people: 24 ÷ 2 = 12 days. Finishes at the end of day 14.

Q112 **Answer: A) We know little about how the other 98% would find it**

The 95% applies to a small, self-selected group. It cannot be extended to all users.

Q113 **Answer: C) 3**

This is a classic puzzle: with 3 weighings you have 27 possible outcomes, enough to tell 24 cases (12 coins × heavy/light) apart. 2 weighings give only 9 outcomes, which is too few.

Q114 **Answer: D) Freelancers need much more supervision and rework, raising total costs**

If hidden costs (supervision, rework) make freelancers costlier overall, the claim of 'cheaper' fails.

Q115 **Answer: A) Bigger populations lead to both more hospitals and more deaths**

A third factor — population size — drives both. Correlation here is not causation.

Q116 **Answer: B) 9 days**

Critical path: A (2) → C (4) → D (2) → E (1) = 9 days. A → B → D → E is only 8, so C is on the critical path.

Q117 **Answer: A) Option 1**

Option 2: 0.8 × 0.9 = 0.72 → 28% total discount. Option 1 gives 30%, so it is better.

Q118 **Answer: B) Students' interview performance affects their selection**

The plan only works if better interview performance leads to more selections.

Q119 **Answer: C) Some B are not D**

The B's that are C cannot be D, so some B are not D. The others are not guaranteed.

Q120 **Answer: A) Explain the risks, share the true results and suggest how to present them honestly**

Falsifying data is unethical and risky. A professional raises concerns and offers an honest alternative.

Q121 **Answer: C) 2,074**

Growth is 20% each month. Apr = 1,440 × 1.2 = 1,728. May = 1,728 × 1.2 = 2,073.6 ≈ 2,074.

Q122 **Answer: D) Looking only for information that supports what you already believe**

Confirmation bias is favouring evidence that matches your existing view and ignoring the rest.

Q123 **Answer: A) Only II is enough**

I gives only part of the cost. II: total cost = 0.8 × 12 = ₹9.6 lakh < ₹12 lakh → profitable. II alone answers it.

Q124 **Answer: B) Route X**

X: 40 ÷ 40 = 1 hour. Y: 30 ÷ 20 = 1.5 hours. X is faster even though it is longer.

Q125 **Answer: B) It is a leading question that pushes a particular answer**

The wording suggests the expected answer, which biases the results.

Q126 **Answer: D) Ask each to state their reasoning and agree on objective criteria to compare the options**

Clear reasoning and agreed criteria (cost, risk, time) turn a conflict into a decision based on facts.

Q127 **Answer: A) 5**

Worst case: 2 red and 2 green after 4 draws. The 5th marble must make 3 of one colour.

Q128 **Answer: C) Better students may choose the front row; the seat may not cause the grades**

The link might be reversed or due to motivation, not seating. Moving everyone forward may not change grades.

Q129 **Answer: C) After 13 months**

P costs more at first but saves ₹15,000 per month. Break-even: 2,00,000 ÷ 15,000 ≈ 13.3 months. From the 14th month P is cheaper overall — i.e. after about 13 months.

Q130 **Answer: A) The server is not overloaded**

Overload → time > 2 s. The time is not > 2 s, so (by contrapositive) the server is not overloaded.

Q131 **Answer: C) Bug 3, because security risks can cause severe damage once exploited**

A security vulnerability can lead to data breaches and legal issues; its potential impact is the highest.

Q132 **Answer: B) 5**

Probability of a correct guess = 1/4. Expected correct = 20 × 1/4 = 5.

Q133 **Answer: C) Retention and active usage after download**

Downloads alone do not show quality. Whether users keep using the app is a better measure.

Q134 **Answer: B) After 38 minutes**

First 20 minutes: net filling = 10 − 4 = 6 L/min → 120 L.

Remaining 180 L at 10 L/min takes 18 minutes. Total = 20 + 18 = 38 minutes.

Q135 **Answer: A) Use clear metrics to track and improve performance**

The idea is to define measurable indicators (KPIs) so progress and problems can be seen.

Q136 **Answer: D) From what starting figure, over what period, and what was your specific role?**

A percentage means little without the base, the time frame and the person's actual contribution.

Q137 **Answer: A) IT**

Chen = Finance. Anu is not in IT, so Anu = HR. Bilal = IT.

Q138 **Answer: D) Continuing a failing project only because a lot has already been spent on it**

Past spending cannot be recovered; decisions should be based on future value, not on money already spent.

Q139 **Answer: C) All managers are engineers**

'All managers are engineers' directly contradicts 'some managers are not engineers'. The others can be true together with it.

Q140 **Answer: A) ₹1,50,000**

Before: 200 buyers × ₹1,500 = ₹3,00,000. After: 300 × ₹1,500 = ₹4,50,000. Extra = ₹1,50,000.

Q141 **Answer: C) Point out the conflict and get the correct requirement confirmed in writing**

Raising the conflict early and confirming in writing avoids wasted work and later disputes.

Q142 **Answer: A) A is a likely cause of B**

Cheaper delivery on one app pulls customers away from rivals.

Q143 **Answer: D) 120**

For a round table, fix one person and arrange the rest: (6 − 1)! = 5! = 120.

Q144 **Answer: B) Hardware failure, malware or mistakes can cause permanent data loss**

Backups protect against unexpected, permanent loss of data.

Q145 **Answer: D) Green tea drinkers may also exercise more and eat healthier**

Lifestyle differences could be the real cause; the study must control for them.

Q146 **Answer: A) The 20 high-value tasks first**

The Pareto (80/20) principle suggests focusing on the few tasks that deliver most of the value.

Q147 **Answer: C) 15 minutes**

List the departures: 6:10, 6:35, 7:00, 7:25, 7:50, 8:15 …

The 7:50 train has already left, so the next one is at 8:15. Wait = 15 minutes.

Q148 **Answer: B) Increase monthly sign-ups by 10% by 31 March**

SMART = Specific, Measurable, Achievable, Relevant, Time-bound. Only the first has a number and a deadline.

Q149 **Answer: B) P**

P: 10,000 × 10 × 3 ÷ 100 = ₹3,000.

Q: 10,000 × $(1.09^3 - 1)$ = 10,000 × 0.295 ≈ ₹2,950. So P earns slightly more.

Q150 **Answer: A) Comparing output per employee before and after a pilot, against a similar team that kept 5 days**

A before-and-after pilot with a comparison (control) group shows whether the change itself improved output.
